

TEST CASE DOCUMENT

1.Home page

Test Case ID	Test Case Description	Pre -Condition	Test Scenario	Test Case	Test Data	Expected Result	Actual Result	Status	Comments
TC_01	Verify home page loading.	Internet in on condition.	Open website.	Type URL.	demoqa.com	Page loads successfully	Page loaded successfully	Pass	
TC_02	Verify page title.	Page must be open.	Check title.	Observe title.	-	Correct title displayed	Displays correct title	Pass	
TC_03	Verify icons and element visibility.	Page must be open.	Check UI.	Observe icons and elements.	-	Proper visibility	Properly visible	Pass	
TC_04	Verify scroll functionality.	Page must be open.	Scroll page.	Scroll down and up.	-	Smooth scrolling	Works properly	Pass	
TC_05	Verify zoom in and zoom out.	Page must be open.	Zoom function.	Zoom in and out.	-	Zooms in and out properly.	Works properly.	Pass	

2.Elements Module

Test Case ID	Test Case Description	Pre -Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual Results	Status	Comments
TC_06	Verify 'elements' are clickable	Homepage	Click 'elements' module.	Click 'elements'	-	Must click and sidebar options must appear.	Clicks and sidebar options appears successfully.	Pass	

TC_07	Verify sidebar menu.	Elements card sidebar options must be shown.	Verify all menu visible.	Observe options.	-	All options visible.	Visible	Pass	
TC_08	Verify text box option	Sidebar visible	click text box option.	Click text box.	-	Page open	Opens successfully	Pass	
TC_09	Verify check box option.	Sidebar visible.	verify check box	Click check box.	-	Page open	Opens page	Pass	
TC_10	Verify radio button option	Sidebar visible	verify radio button option.	Click option	-	Page open	Opens page	Pass	
TC_11	Verify web table option	Sidebar visible	verify web table option	Click web table option	-	Page open	Opens page	Pass	
TC_12	Verify buttons option	Sidebar visible	verify buttons option	Click buttons option	-	Page open	Opens page	Pass	
TC_13	Verify links option	Sidebar visible	verify links option	Click links option	-	Page open	Opens page	Pass	
TC_14	Verify broken links-images option	Sidebar visible	verify broken links-images option	Click broken links-images option	-	Page open	Opens page	Pass	
TC_15	Verify upload and download options	Sidebar visible	verify upload and download options	Click upload and download options	-	Page open	Opens page	Pass	
TC_17	Verify dynamic properties option	Sidebar visible	verify dynamic properties option	Click dynamic properties option	-	Page open	Opens page	Pass	

3.TEXT BOX (Inside Elements)

Test Case ID	Test Case Description	Pre-Condition	Test Case Scenario	Test Case	Test Data	Expected Results	Actual Results	Status	Comments
TC_18	Verify full name field accepts valid input.	Text box page open	To verify name field	Enter name	Shreyaa R S	Accept input	Accepted	Pass	
TC_19	Verify full name field rejects numeric input.	Text box page open	To verify this field rejects numeric input.	Enter numbers	12345	Should show error (or) not accept numbers.	Accepts	Fail	Validation issue

TC_20	Verify full name field rejects special characters.	Text box page open	To verify the field rejects special characters.	Enter few special characters.	@*&@#"	Should show error (or) not accepted.	Accepts	Fail	Validation issue
TC_21	Verify email field accepts valid input.	Text box page open	To verify email field accepts valid input.	Enter email	shreyashre@gmail.com	Accept input	Accepts	Pass	
TC_22	Verify invalid email.	Text box page open	To verify if the field rejects invalid email.	Enter invalid email	1.shreyashregmail.com	Should show error (or) not accepted.	Doesn't accept and highlights box using red colour.	Pass	
					2.shreyashre@gmail	Should show error (or) not accepted	Doesn't accept and highlights box using red colour	Pass	
TC_23	Verify current address field accepts valid input.	Text box page open	To verify the field accepts valid input.	Enter valid address	Chennai, Tamilnadu	Accept input	Accepts	Pass	
TC_24	Verify permanent address field accepts valid input.	Text box page open	To verify the field accepts valid input	Enter valid address	Nagercoil, Tamilnadu	Accept input	Accepts	Pass	
TC_25	Verify multiple lines in address.	Text box page open	To Verify multiple lines in address.	Enter address in multiple lines.	Ramnagar Main Road Ramnagar, Chennai , Tamil Nadu, India.	Accept input	Accepts	Pass	
TC_26	Enter long address	Text box page open	To Enter long address	Enter long address.	Sri Sai Residency Apartments, Ramnagar Main Road, Behind Government Higher Secondary School, Opposite Children's Park Velachery Zone, South Chennai.	Accept input	Accepts	Pass	

TC_27	Verify numbers and special characters.	Text box page open	To Verify numbers and special characters.	Enter numbers and special characters	“street-12,#4road”	Accept input	Accepts	Pass	
TC_28	verify submit button	Filled fields	To verify submit button	Click submit.	-	Submits	Submitted	Pass	
TC_29	Verify empty submit field	Page open	To verify empty field submit.	Keep all fields unfilled.	-	Should not submit.	Submitted	Fail	Bug

4.Buttons (Inside Elements)

Test Case ID	Test Case Description	Pre - Condition	Test Scenario	Test Case	Test Data	Expected Result	Actual Result	Status	Comments
TC_30	Verify double click button.	Button element page open	To verify double click button	Double click on the ‘double click’ button.	-	Show message	Shown	Pass	
TC_31	Verify right click button.	Button element page open.	To Verify right click button.	Right click on the ‘right click’ button.	-	Show message	Shown	Pass	
TC_32	Verify click me button.	Button element page open.	To Verify click me button.	Click on the click me button.	-	Show message	Shown	Pass	

5.Links (Inside Elements)

Test Case ID	Test Description	Pre - Condition	Test Scenario	Test case	Test Data	Expected Result	Actual Result	Status	Comments
TC_33	Verify links	Link page open	To verify if link loads.	Click on the link.	-	Page open	Opens page	Pass	
TC_34	Verify if link sends API message.	Link page open	To verify if link sends API message.	Click on the link	-	Sends API message.	Sends API message.	Pass	
TC_35	Verify valid image.	Broken link page open.	To verify valid image display	Open page and observe valid image.	Valid image URL.	Image should load and display properly.	Image is not displayed, broken icon shown.	Fail	Valid image not loading.

TC_36	Verify broken image.	Page open.	To verify broken image shown for invalid image.	Load page and observe image.	Invalid image URL.	Broken image icon.	Broken image icon displayed.	Pass	
TC_37	Verify valid link.	Page open.	To verify valid link redirects to correct page.	Click on “click here for valid link”.	Valid URL.	Should redirect to correct page.	Redirects successfully.	Pass	
TC_38	Verify broken link.	Page open.	To check behaviour when clicked broken link.	Click on “click here for broken link”.	Invalid URL.	Should display error page 404.	Displayed.	Pass	

6.Forms Module

Test Case ID	Test Case Description	Pre-Condition	Test Case Scenario	Test Case	Test Data	Expected Results	Actual Results	Status	Comments
TC_39	Verify form field.	Page open.	Check forms field.	Observe field.	-	All field visible.	Visible.	Pass	
TC_40	Verify form submit	Details filled.	Check submit button.	Click submit after filling details.	-	Submit should be successful and displays all details in a popup.	Submitted successfully and displays all details in a popup.	Pass	
TC_41	Verify empty field submission not accepted.	Empty fields.	To verify empty field submission not accepted.	Click submit with no details filled.	-	Should not submit and must show the unfilled area with red outline.	Did not submit and shows the unfilled area with red outline.	Pass	
TC_42	Verify phone validation.	Page open.	To verify phone number field.	1.Enter letters	Abc	Should not accept and must show that field with red outline.	Did not accept and shows that field with red outline.	Pass	
				2.Enter digits less than 10.	36478	Should not accept and must show	Did not accept and shows that	Pass	

						that field with red outline.	field with red outline.		
TC_43	Verify picture field.	Page open.	To check if files can be uploaded.	Click on choose file.	Upload file.	Once clicked should navigate to files and allow to select a file. Once selected the file name must be displayed.	Once clicked navigates to files and allows to select a file then the selected file name is displayed successfully.	Pass	
TC_44	Verify the close button in the pop up.	Pop up page open.	To check if the close button in the pop up works.	Click on close button.	-	Should close the pop up page and display the previous page.	Does not respond.	Fail	Button does not work.

7.Alerts, Frames and Windows Module

Test Case ID	Test Case Description	Pre-Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_45	Verify visibility of “Alerts, Frames and Windows” icon.	Availability of left side menu panel.	To verify if the icon is properly visible.	Open URL, observe left side menu panel, locate “alerts, frames and windows” and check the icon displayed.	-	The icon should be fully visible.	The icon is partially visible. It appears cut, making it partially visible.	Fail	UI Issue.

8.Browser Windows (Inside Alerts, Frames and Windows)

Test Case ID	Test Case Description	Pre - Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
--------------	-----------------------	-----------------	---------------	-----------	-----------	------------------	----------------	--------	----------

TC_46	Verify “new tab” button.	Page open.	To verify “new tab” button functionality.	Open browser windows and click on new tab button.	-	A new browser tab should open.	Opened a new browser tab.	Pass	
TC_47	Verify “new window” button functionality.	Page open.	To verify “new window” button functionality	Open browser windows and click on “new window” button.	-	A new browser window should open.	Opened a new browser window.	Pass	
TC_48	Verify “new window message” button functionality.	Page open	To verify “new window message” button functionality	Open browser windows and click on “new window message” button.	-	A new browser window message should open.	Opened a new browser window message.	Pass	

9.Alerts (Inside Alerts, Frames and Windows)

Test Case ID	Test Case Description	Pre - Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_49	Verify alert popup.	Alerts page open.	To verify simple alert popup.	Open alert page and click the first “click me” button.	-	1. An alert popup should appear immediately. 2. Alert should contain a message. 3. User should be able to click “ok”.	1.An alert popup appears immediately. 2. Alert contains a message. 3. User is able to click “ok”.	Pass	
TC_50	Verify delayed alert functionality.	Alert page open.	To verify alert appears after 5 seconds.	Open alert page and click the second “click me” button and wait for 5 seconds.	-	1.Alert should appear after 5 seconds delay. 2. Alert should contain a message. 3. User should be able to click “ok”.	1. Alert appears after 5 seconds delay. 2. Alert contains a message. 3. User is able to click “ok”.	Pass	

TC_51	Verify confirmation alert.	Alert page open.	To verify if confirm box appears with OK & Cancel.	Open alert page and click the third “click me” button	-	1.Confirmation alert should appear with ok and cancel buttons. 2.Clicking “ok” must show a message “you selected ok”. 3.Clicking cancel must show a message “you selected cancel”.	1.Confirmation alert appears with ok and cancel buttons. 2.Clicking “ok” shows a message “you selected ok”. 3.Clicking cancel shows a message “you selected cancel”	Pass	
TC_52	Verify alert with input field.	Alert page open.	To verify if clicking the click me button opens an alert with input field and also with OK & Cancel buttons.	Click the fourth click me button. Enter a text and click either ok or cancel.	Shreyaa	An alert should appear with a text input field and also with OK & Cancel buttons.	1.An alert appears with a text input field and also with OK & Cancel buttons. 2. Clicking “ok” shows a message “you entered Shreyaa”.	Pass	
TC_53	Verify validation for name input in prompt alert.	Alert page open.	Check whether the alert input field restricts numeric values when entering a name.	Click the fourth click me. Enter numeric values.Click ok.	123456	1.Should not accept numeric input. 2.Should display a message “only alphabets allowed”.	1.Accepts numeric values and shows a text “you entered 123456”.	Fail	Validation issue

10.Frames (Inside Alerts, Frames and Windows)

Test Case ID	Test Case Description	Pre - Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_54	Verify visibility of content in first frame.	Frames page open.	Check whether the first frame displays the text properly.	Open the Frames page and observe the first frame.	-	First frame should display text “This is a sample page” clearly.	Text is displayed correctly.	Pass	
TC_55	Verify second frame visibility and size.	Frames page open.	Check if the second frame is displayed properly with smaller size.	Observe the second frame.	-	Second frame should be visible. It should be smaller than the first frame.	Frame is visible and smaller.	Pass

11.Accordion (Inside Widgets Module)

Test Case ID	Test Case Description	Pre - Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_57	Verify Accordion loads properly.	Page loaded.	To check if accordion loads properly.	Observe if accordion sections are visible.	-	All accordion headers are displayed.	All accordion headers are displayed properly.	Pass	
TC_58	Verify section is expanded when clicked.	Page loaded.	Verify if a section is expanded when clicked.	Click on “Where does it come from?”.	-	Section should expand and content must be displayed.	Section expands and content is displayed.	Pass	
TC_59	Verify expanded section is closed when clicked.	One section expanded.	Verify if the expanded section is closed when	Click on already opened section.	-	Section should close and content should be hidden.	Section closes and contents are hidden.	Pass	

			clicking the section.						
TC_60	Verify only one section open at a time.	Page loaded.	Only one section open at a time.	Open one section then open another.	-	Previously opened section should close.	Previously opened section closes.	Pass	
TC_61	Verify toggle icon behaviour.	Page loaded.	Verify toggle icon behaviour.	Click expand/close icon.	-	Icon should change direction correctly.	Icon changes direction correctly.	Pass	

12.Auto Complete (Inside Widgets Module)

Test Case ID	Test Case Description	Pre - Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_62	Verify user can enter multiple colours.	Auto complete page open.	Enter colours name in multiple input field.	1.click on “type colour name”. 2. Type colours names. 3. Select from suggestions	Red Blue	Selected colours appear as tags and multiple colours should be able to be selected.	Selected colours appeared as tags and multiple can be selected.	Pass	
TC_63	Verify auto complete for single color field.	Auto complete page open.	Enter a colour name in single color name field.	1.click on “type colour name”. 2. Type a colour name. 3. Select from suggestions.	Yellow	Selected colour appear as tag.	Selected colour appeared as tag.	Pass	
TC_64	Verify suggestions for partial input.	Auto complete page open.	To verify suggestions for partial input.	Enter partial colour name.	Re	Suggestions like red should display.	Suggestion displayed.	Pass	
TC_65	Verify double entry.	The colour should already be entered.	To verify if it prevents double entry.	Enter already selected colour again.	Red	Prevent double entry by either not showing suggestion or avoid	Prevents double entry by not showing suggestion and if typed colour	Pass	

						accepting that colour.	it avoids accepting that colour.		
TC_66	Verify user can delete selected colour.	Colours should be selected.	Remove colour.	Click “x” on selected colour.	Red	Colour should be removed from list.	Colour removed.	Pass	
TC_67	Verify behaviour when user enters value not present in the suggestion list.	Auto complete page open.	User types invalid or unavailable colour.	1.Click on field. 2.Type unavailable colour name. 3.Observe	Pink	1.Should display “no results found”. 2.Restrict invalid input. 3.Should allow it and convert to a value.	Input remains as plain text.	Fail	Does not provide feedback.

13.Date Picker (Inside Widgets Module)

Test Case ID	Test Case Description	Pre - Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_68	Verify date picker opens on clicking date field.	Date picker page open.	To verify calendar popup.	Click on “select date” input field.	-	Calendar popup should be displayed.	Displays calendar popup.	Pass	
TC_69	Verify user can select a date.	Calendar open.	To Select date.	Click on input field and select a date.	26/04/2004	Selected date should appear in input field.	Selected date appears in input field.	Pass	
TC_70	Verify user can change month and year.	Calendar open.	Navigate to another month and year.	Click next arrow (>) and observe month and year change.	-	Month and year should change accordingly.	Month and year changes accordingly.	Pass	
TC_71	Verify user can change year.	Calendar open.	Select a different year.	Click year dropdown and choose an year.	2004	Calendar should display the selected year.	Calendar displays the selected year.	Pass	
TC_72	Verify manual input in the date field in MM/DD/YY format.	Presence of input field.	To check if user can enter date manually.	Click input field and type 04/26/2004.	04/26/2004.	Date should be accepted and displayed.	Date accepted and displayed.	Pass	

TC_73	Verify manual input in the date field in DD/MM/YY format.	Presence of input field.	To check if user can enter date manually.	Click input field and type 26/04/2004.	26/04/2004.	1.Date should be accepted and displayed. 2.If the system follows MM/DD/YY format strictly then should show a message suggesting to enter data in MM/DD/YY format.	Did not accept and shows default input field after clicking enter.	Fail	1.The system follows MM/DD/YY format strictly. 2.Did not show a message suggesting to enter data in MM/DD/YY format.
TC_74	Verify behaviour for invalid data.	Presence of input field.	To check if it rejects invalid date.	Type 04/35/2004.	04/35/2004.	System should show error. (or) reject invalid input.	Did not accept and shows default input field after clicking enter.	Pass	
TC_75	Verify default date is displayed.	Page loaded.	To check default value.	Observe date field.	-	Current date should be displayed.	Displays current date.	Pass	
TC_76	Verify calendar closes properly.	Calendar open.	To check if calendar closes properly.	Click outside calendar when calendar open.	-	Calendar should close.	Calendar closes.	Pass	
Tc_77	Verify that the date and time field allows user to select both date and time.	Date and time field visible.	To check that the date and time field allows user to select both date and time.	1.Click on date and time field. 2.Select a date. 3.Select a time. 4.Press enter.	April 26,2004 08:15 PM	1.Selected date and time should be visible in the field. 2.Format should be like April 26,2004 08:15 PM. 3.dropdowns must close after selection.	1.Selected date and time is visible in the field. 2.Format is like April 26,2004 08:15 PM. 3.Dropdowns closes after selection.	Pass	
TC_78	Verify manual date and time entry.	Date and time field visible.	To verify manual date and time entry.	Type valid date and time	August 8,1997 08:15 PM.	Input accepted.	Accepts input and displays in	Pass.	

				in proper format.			the field after clicking enter.		
TC_79	Verify manual invalid input.	Date and time field visible.	To verify manual invalid date and time entry.	Type invalid date and time .	August 32,1997 08:15 PM.	System should show error. (or) reject invalid input.	Did not accept and shows previously entered input after clicking enter.	Pass.	

14.Slider (Inside Widgets Module)

Test Case ID	Test Case Description	Pre-Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_80	Verify slider is displayed properly.	Slider page open.	Verify slider is displayed properly.	Observe the slider.	-	Slider and input box should be properly visible.	Slider and input box properly visible.	Pass.	
TC_81	Verify slider increase value.	Slider should be in left end.	To verify slider increase value.	Drag slider towards right.	-	1.Value should increase. 2.Input box value should change accordingly.	1.Value increases. 2.Input box value changes accordingly.	Pass	
TC_82	Verify slider decrease value.	Slider should be in right end.	To verify slider decrease value.	Drag slider towards left.	-	1.Value should decrease. 2.Input box value should change accordingly.	1.Value decreases. 2.Input box value changes accordingly.	Pass	
TC_83	Verify manual input.	Presence of input box.	To verify manual input.	Enter value in text box.	82	Slider should move to 80 position.	Input box doesn't accept manual value.	fail.	Input field is not editable and accepts only through slider interaction.
TC_84	Verify minimum value.	Slider should be in working condition.	To verify minimum value.	Mover slider to extreme left.	-	Value should not go below 0.	Value is 0.	Pass	

TC_85	Verify maximum value.	Slider should be in working condition.	To verify maximum value.	Mover slider to extreme right.	-	Value should not go beyond 100.	Value is 100.	Pass	
-------	-----------------------	--	--------------------------	--------------------------------	---	---------------------------------	---------------	------	--

14.Progress bar (Inside Widgets Module)

Test Case ID	Test Case Description	Pre-Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_86	Verify progress bar visibility.	Progress bar page loaded.	To check if progress bar is displayed.	Observe progress bar.	-	Proper visibility of progress bar.	Properly visible.	Pass	
TC_87	Verify initial progress value.	Progress bar page loaded.	To verify initial progress value.	Observe default progress bar value.	-	Progress should be at initial value (0 %).	Shows 0%	Pass	
TC_88	Verify start button visibility.	Progress bar page loaded.	To verify start button visibility.	Check if start button is displayed.	-	Start button should be visible and enable.	Start button visible.	Pass	
TC_89	Verify start button functionality.	Visibility of start button.	To verify start button functionality.	Click on start button.	-	Progress bar should start increasing.	Progress bar starts increasing.	Pass	
TC_90	Verify progress completion.	Progress bar should be in start state.	To verify progress completion.	Wait until completion.	-	Progress bar should reach 100%.	Progress bar reaches 100%.	Pass	
TC_91	Verify behaviour after completion.	Progress completed.	To verify behaviour after completion.	Check if button shows reset after completion.	-	Progress stops and should show reset button.	Progress stops and shows reset button.	Pass.	

15.Tabs (Inside Widgets Module)

Test Case ID	Test Case Description	Pre - Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_92	Verify tab visibility.	Page loaded.	To verify tab visibility.	Check if all tabs (what, origin, use, more) are displayed.	-	All tabs should be visible and properly aligned.	All tabs are visible and properly aligned	Pass.	

TC_93	Verify which tab is selected by default.	Page loaded.	To verify which tab is selected by default.	Check which tab is selected by default.	-	“What” tab should be selected by default.	“What” tab is selected by default.	Pass	
TC_94	Verify tab switching functionality.	Tabs visible.	To verify tab switching functionality.	Click on “Origin” tab.	-	Content under “Origin” should display.	Content under “Origin” is displayed.	Pass.	
TC_95	Verify “more” tab click functionality.	Tabs page loaded.	To verify “more” tab click functionality.	Click on “More” tab.	-	“More” tab should be clickable and display its content.	“More” tab is not clickable and no action happens.	Fail.	“More” tab is disabled.

16. Menu (Inside Widgets Module)

Test Case ID	Test Case Description	Pre-Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_96	Verify menu visibility.	Page open.	To verify menu visibility.	Check if Main item 1, Main item 2, Main item 3 are displayed.	-	All main menu items should be visible.	All main menu items are visible.	Pass.	
TC_97	Verify hover on main item 2.	Menu visible.	To verify hover on main item 2.	Move cursor over “Main item 2”.	-	Sub items should be displayed.	Sub items displayed.	Pass.	
TC_98	Verify hover on main item 1.	Menu visible.	To verify hover on main item 1.	Move cursor over “Main item 1”.	-	Sub items should be displayed.	No sub item displays.	Fail.	Main item 1 does not show sub item on hover unlike main item 2.
TC_99	Verify hover on main item 3.	Menu visible.	To verify hover on main item 3.	Move cursor over “Main item 3”.	-	Sub items should be displayed.	No sub item displays.	Fail.	Main item 3 does not show sub item on hover unlike main item 2.
TC_100	Verify hover highlight effect.	Menu visible.	To verify hover highlight effect.	Hover on all items.	-	Each item should show hover highlight effect.	Each item shows hover highlight effect.	Pass.	

17. Select Menu (Inside Widgets Module)

Test Case ID	Test Case Description	Pre-Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_101	Verify select value dropdown functionality.	User is on select menu page.	Validate dropdown behaviour and typing input.	1.Click dropdown. 2.Observe options. 3.Hover over options and select an option.	-	1.Dropdown appears and options should be highlighted on hover. 2.Selected value should be displayed.	1.Dropdown appears and options are highlighted on hover. 2.Selected value is displayed in the input field.	Pass.	
TC_102	Verify if it accepts entering valid input.	User is on select menu page.	To verify if it accepts entering valid input.	Click on the input field and type valid data.	Group 1.	1.Dropdown similar to entered data should appear and user should be able to select it. 2.Selected or entered data should be visible in the input field.	Accepts entering valid input.	Pass.

TC_110	Verify if it rejects entering invalid input.	User is on select menu page.	To verify if it rejects entering invalid input.	Type invalid input.	Ball	“No options” message should display.	“No options” message displays.	Pass.	
TC_111	Verify removal of single selected option.	Multiple options are selected.	To check removal functionality.	Click “x” on selected item.	Remove “green”.	Selected item should be removed.	Selected item alone removes.	Pass.	

TC_112	Verify clearing of selected options.	Multiple options are selected.	To check clear all functionality.	Click “x” at the extreme right end of the input field box.	-	All selected items should be removed.	Removes all selected items.	Pass.	
--------	--------------------------------------	--------------------------------	-----------------------------------	--	---	---------------------------------------	-----------------------------	-------	--

18. Interaction Module

Test Case ID	Test Case Description	Pre - Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_113	Verify visibility and alignment of interactions module.	Availability of left side menu panel.	To verify visibility and alignment of interactions module.	Observe the interactions module.	-	Proper alignment and visibility.	Proper alignment and visibility.	Pass.	
TC_114	Verify if sub field displays on clicking “interactions”.	Availability of left side menu panel.	To verify if sub field displays on clicking “interactions”.	Click on “Interaction”.	-	Sub fields should display properly.	Sub fields displays properly.	Pass.	

19.Sortable (Inside Interaction Module)

Test Case ID	Test Case Description	Pre - Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_115	Verify if list tab is clickable and active.	Sortable page open.	To verify if list tab is enable.	Click on list tab.	-	List tab should be active and content under it should be displayed.	List tab is active and content under it displays.	Pass.	
TC_116	Verify if grid tab is clickable and active.	Sortable page open.	To verify if grid tab is enable.	Click on grid tab.	-	Grid tab should be active and content under it should be displayed.	Grid tab is active and content under it displays.	Pass.	

TC_117	Verify items can be reordered in list view.	Contents should be available under list tab.	To verify items can be reordered in list view	Drag an item and drop it in a new position.	Move “five” to position 1.	Item should be moved to new position.	Item moved to new position successfully.	Pass.	
TC_118	Verify items can be reordered in grid view.	Contents should be available under grid tab.	To verify items can be reordered in grid view.	Drag an item and drop it in a new position.	Move any tile.	Item should be moved to new position.	Item moved to new position successfully.	Pass.	

20.Selectable (Inside Interaction Module)

Test Case ID	Test Case Description	Pre-Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_119	Verify list tab displays options.	Selectable page loaded.	Validate list visibility.	Click on “list” tab.	-	List tab should be active and 4 options should be displayed.	List tab is active and 4 options are displayed.	Pass.	
TC_120	Verify single item selection.	List tab should display options.	To verify single item selection.	Click on one option.	Option 1.	Selected item should be highlighted.	Selected item gets highlighted.	Pass.	
TC_121	Verify multiple items can be selected.	List tab should display options.	To verify multiple item selection.	Select multiple options using mouse.	Option1 Option 2	Multiple items should be highlighted.	Multiple item gets highlighted.	Pass.	
TC_122	Verify deselection of an item.	Item should be selected.	To verify deselection of an item.	Click on already selected item.	Option1.	Item should be unselected (highlight removed).	Item gets unselected (highlight removed).	Pass.	
TC_123	Verify grid tab functionality.	User on selectable page.	To verify grid tab functionality	Click on “grid” tab.	-	Grid layout should be displayed.	Displays grid layout.	Pass.	
TC_124	Verify multiple selection in grid.	Grid tab should display options.	To verify multiple item selection.	Select multiple options using mouse.	Tile1 Tile 2	Multiple items should be highlighted.	Multiple items get highlighted.	Pass.	
TC_125	Verify deselection in grid.	Item should be selected.	To verify deselection of an item.	Click on already selected item.	Tile 1.	Item should be unselected (highlight removed).	Item gets unselected (highlight removed).	Pass.	

21.Resizable (Inside Interaction Module)

Test Case ID	Test Case Description	Pre-Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_126	Verify default size of first resizable box.	User is on resizable page.	Validate initial state.	Observe the first box.	Expected 200 x 200.	Box should be displayed with default size.	Displays at 200x200.	Pass.	
TC_127	Verify maximum resize limit of first box.	First box visible.	Validate maximum boundary.	Drag resize handle to enlarge box.	Max:500 x 300.	Box should not resize beyond 500 x 300.	Box enlarges up to 500 x 300.	Pass.	
TC_128	Verify minimum resize limit of first box.	First box visible.	Validate minimum boundary.	Drag resize handle to shrink box.	Min: 150 x 150.	Box should not shrink below 150 x 150.	Box shrinks up to 150 x 150.	Pass.	
TC_129	Verify resize functionality.	First box visible.	Validate resizing behaviour.	Drag resize handle in different sizes between min and max.	-	Box should resize smoothly.	Box resizes smoothly.	Pass.	
TC_130	Verify second box expands without limit.	Second box visible.	Validate unlimited expansion.	Drag resize handle to increase size continuously.	-	Box should keep expanding without limits.	Box keeps expanding.	Pass.	No max limit observed.
TC_131	Verify second box shrinks to very small.	Second box visible.	Validate minimum boundary.	Drag resize handle to shrink box.	-	Box should shrink to very small size.	Box shrinks to very small size.	Pass.	

22.Droppable (Inside Interaction Module)

Test Case ID	Test Case Description	Pre - Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_132	Verify elements in “simple” tab.	User is on droppable page.	Validate elements in “simple” tab.	Observe the “simple” tab.	-	“Drag me” and “Drop here” box should be visible.	“Drag me” and “Drop here” box are visible.	Pass.	

TC_133	Verify drag action of “drag me” box.	Simple page loaded.	Verify draggable behaviour.	Click and hold “Drag me” and move mouse.	-	Box should move along with mouse cursor.	Box moves along with cursor.	Pass.	
TC_134	Verify drop inside target box.	Simple page loaded.	Validate drop functionality.	Drag “Drag me” box into “drop here” box and release.	-	1.Box should be dropped inside target box. 2.Text inside box should change to “dropped!”.	1.Box dropped inside target box. 2.Text inside box changed to “dropped!”.	Pass.	
TC_135	Verify drop outside target area.	Simple page loaded.	To verify drop outside target area.	Drag and release outside the target box.	-	Box should remain at the position where it is dropped.	Box stays where dropped.	Pass.	Application allows free drop outside target.
TC_136	Verify draggable can be moved back.	Box already dropped inside target box.	To validate drag back functionality.	Drag the box again and move it back outside.	-	Box should move freely and return to original area.	Moves freely and can be dropped outside,	Pass.	
TC_137	Verify drop box text resets when dragged item is removed.	“drag me” box is already dropped inside and text shows “dropped”.	Validate text resets after re-drag.	Drag the box out of target area and observe text change.	-	Drop box text should change back to drop here text.	Drop box doesn’t change back to drop here.	Fail.	Drop box state is not resetting back to drop here after element removal.
TC_138	Verify elements in accept tab.	User is on droppable page.	To verify elements in accept tab.	Click on “accept” tab.	-	Drop box “acceptable” and “not acceptable” boxes should be visible.	Drop box “acceptable” and “not acceptable” boxes are visible	Pass	
TC_139	Verify draggable behaviour of “acceptable” box.	Accept tab is active.	Validate drag functionality.	Click and drag “Acceptable” box.	-	Box should move along with cursor.	Box moves along with cursor.	Pass.	
TC_140	Verify dropping “Acceptable” element.	Accept tab is active.	Validate drop.	Drag “Acceptable” box and drop	-	1.Box should be placed inside drop box.	1.Box can be successfully placed inside drop box.	Pass.	

				inside drop box.		2.Drop box colour should change to green while “acceptable” box enters drop box. 3. Text inside box should change to “dropped!”.	2.Drop box colour changes to green while “acceptable” box enters drop box. 3.Text changes to dropped!.		
TC_141	Verify draggable behaviour of “Not Acceptable” box.	Accept tab is active.	Validate drag functionality.	Click and drag “Not Acceptable” box.	-	Box should move along with cursor.	Box moves along with cursor.	Pass.	
TC_142	Verify dropping “Not Acceptable” element.	Accept tab is active.	Validate drop.	Drag “Not Acceptable” box and drop inside drop box.	-	1.Box should be placed inside drop box. 2.Drop box colour should not change to green while “not acceptable” box enters drop box.	1.Box can be successfully placed inside drop box. 2.Drop box colour did not change to green while “not acceptable” box enters drop box.	Pass	
TC_143	Verify elements in “prevent propagation” tab.	User is on droppable page.	To verify elements in “prevent propagation” tab.	Click on “prevent propagation” tab.	-	Two droppable boxes present and one “drag me” box.	Two droppable boxes and one “drag me” box are visible	Pass	
TC_144	Verify drag over outer drop area (first box).	User is on droppable page.	Validate drag.	Drag item to outer box.	-	Outer box should turn light green when hovered.	Outer box turns light green when hovered.	Pass.	

TC_145	Verify drop item in outer drop area (first box).	Drag in process.	Validate drop.	Drag and drop in outer box area.	-	Box should turn green on hover then changes to blue after drop.	Box turns green on hover then changes to blue after drop.	Pass	
TC_146	Verify drag over inner drop area (second box).	User is on droppable page.	Validate drag.	Drag item to inner box.	-	Inner box should turn light green when hovered.	Inner box turns light green when hovered.	Pass.	
TC_147	Verify drop item in inner drop area (second box).	Drag in process.	Validate drop.	Drag and drop in inner box area.	-	Box should turn green on hover then changes to blue after drop.	Box turns green on hover then changes to blue after drop.	Pass	
TC_148	Verify drag over outer drop area (second box).	User is on droppable page.	Validate drag.	Drag item to outer box.	-	Outer box should turn light green when hovered.	Outer box turns light green when hovered.	Pass.	
TC_149	Verify drop item in outer drop area (second box).	Drag in process.	Validate drop.	Drag and drop in outer box area.	-	Box should turn green on hover then changes to blue after drop.	Box turns green on hover then changes to blue after drop.	Pass	
TC_150	Verify drag over inner drop area (first box).	User is on droppable page.	Validate drag.	Drag item to inner box.	-	Inner box should turn light green when hovered.	Inner box turns light green when hovered.	Pass.	
TC_151	Verify drop item in inner drop area (first box).	Drag in process.	Validate drop.	Drag and drop in inner box area.	-	Box should turn green on hover then changes to blue after drop.	Box turns green on hover then changes to blue after drop.	Pass	
TC_152	Verify colour behaviour of both boxes while dragging.	Drag in process.	Validate colour behaviour.	Drag across both boxes.	-	Both boxes remain green while dragging, focused one	Both boxes are green while dragging, focused one	Pass.	

						become light green.	become light green.		
TC_153	Verify “drag me” can be moved back.	Box already dropped inside target box.	To validate drag back functionality.	Drag the ox again and move it back outside.	-	Box should move freely and return to original area.	Moves freely and can be dropped outside,	Pass.	
TC_154	Verify elements are present in “revert draggable” page.	Page loaded.	To validate elements are present.	Observe screen.	-	All elements should be visible.	Visible.	Pass.	
TC_155	Verify “will revert” and “not revert” are draggable.	“revert draggable” page is open.	To validate drag.	Check draggable items.	-	Both items should be draggable.	Both are draggable.	Pass.	
TC_156	Verify revert behaviour of “will revert”.	Drag in progress.	To validate revert.	Observe after dropping.	-	Item should return to original position.	Item returns to original position	Pass.	
TC_157	Verify “not revert” drop inside drop box.	Drag in progress.	To validate “not revert” behaviour.	Observe after dropping.	-	Item should stay in drop box.	Stays in drop box.	Pass.	

23.Draggable (Inside Interaction Module)

Test Case ID	Test Case Description	Pre-Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_158	Verify draggable elements visibility.	Page loaded.	To validate element visibility.	Observe page.	-	Drag me box should be visible.	Visible.	Pass.	
TC_159	Verify draggable functionality.	Page loaded.	Validate drag functionality.	Click and drag “drag me”.	-	Element should be clickable and draggable.	Element is clickable and draggable.	Pass.	

TC_160	Verify “drag me” element can be moved through the screen.	Drag initiated.	To validate drag across screen.	Click and drag to different positions.	-	Element should move freely in all directions.	Element moves freely in all directions.	Pass.	
TC_161	Verify element should stay at dropped position.	Drag initiated.	Drop element at random positions.	Click, drag and drop element at different positions.	-	Element should stay at dropped position.	Element stays at dropped position.	Pass.	
TC_162	Verify “Axis Restricted” elements visibility.	Verify page is loaded and “Axis Restricted” page is open.	To validate elements visibility.	Observe page.	-	All elements must be visible.	All elements are visible.	Pass.	
TC_163	Verify “only X” is draggable only in x axis.	Drag initiated.	To validate drag.	Click and drag along X axis.	-	Should Drag smoothly along X axis.	Drags smoothly along X axis.	Pass.	
TC_164	Verify “only X” is not draggable in y axis.	Drag initiated.	To validate drag.	Click and drag along Y axis.	-	Should not Drag along Y axis.	Did not Drag along Y axis.	Pass.	
TC_165	Verify “only Y” is draggable only in y axis.	Drag initiated.	To validate drag.	Click and drag along Y axis.	-	Should Drag smoothly along Y axis.	Drags smoothly along Y axis.	Pass.	
TC_166	Verify “only Y” is not draggable in x axis.	Drag initiated.	To validate drag.	Click and drag along x axis.	-	Should not Drag along x axis.	Did not Drag along x axis.	Pass.	
TC_167	Verify “Container Restricted” elements visibility.	Verify page is loaded.	To validate elements visibility.	Observe page.	-	All elements must be visible.	All elements are visible.	Pass.	
TC_168	Verify inner box “I’m contained within the	Verify page is loaded.	To validate drag.	Click and drag inner box inside the container.	-	Inner box should be smoothly draggable	Inner box is smoothly draggable	Pass.	

	box” is draggable.					inside the container.	inside the container.		
TC_169	Verify dragging of “I’m contained within my parent”.	Verify page is loaded.	To validate drag.	Click and drag box.	-	1.Box should not move beyond its parent. 2.if parent size is small, movement may not be visible.	Parent size small and movement not visible.	Pass	

24.Login page (Inside Book Store Application Module)

Test Case ID	Test Case Description	Pre-Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_170	Verify elements.	Login page open.	To validate element visibility.	Open login page and observe.	-	Welcome text, username, password field, login and new user button must be available.	All elements present and visible.	Pass.	
TC_171	Verify login with valid details.	User is registered.	Valid login.	Enter username and password and click login.	shreyaa123 Shreyaa@1#..	User should be redirected to BOOKS page.	Redirects to BOOKS page.	Pass.	
TC_172	Verify login with invalid data.	Page open.	Invalid login.	Enter wrong data and click login.	Abc 1234	Error message should be displayed.	Displays a message “invalid username or password” in red colour.	Pass.	
TC_173	Verify empty login submission.	Page open.	Empty fields.	Click login without entering data.	-	Should show error.	Highlights the fields outline using red colour.	Pass.	

TC_174	Verify navigation to registration.	Page open.	To validate navigation to registration page.	Click “new user”.	-	Should redirect to registration page.	Redirects to registration page.	Pass.	
--------	------------------------------------	------------	--	-------------------	---	---------------------------------------	---------------------------------	-------	--

25.Registration (Inside Book Store Application Module)

Test Case ID	Test Case Description	Pre-Condition	Test Scenario	Test Case	Test Data	Expected Results	Actual results	Status	Comments
TC_175	Verify registration page.	User clicks new user.	To verify register page.	Open registration page.	-	All fields and button should be visible.	Visible.	Pass	
TC_176	Register with valid data.	Registration page open.	Valid registration.	Fill all fields and click register.	-	User registered successfully popup should appear with an ok button.	User registered successfully popup appears with an ok button.	Pass.	
TC_177	Password validation check.	Registration page open.	Invalid password.	Enter weak password.	Shreyaa**(< 8 chars).	Validation message should appear.	A message appears “passwords must have atleast one non alphanumeric character...”).	Pass.	
TC_178	Password rule validation.	Registration page open.	Strong password.	Enter a strong password according to the validation message.	Shreyaa@1#..	Registration should succeed.	Registration succeeded.	Pass.	
TC_179	Error message visibility.	Register button must be clicked.	To validate message display.	Enter invalid password.	Shreyaa**(< 8 chars).	Error message should persist till next password typed.	Disappears quickly.	Fail.	Should stay for long time.
TC_180	Verify registration success popup.	Registration done.	Popup check.	Click register.	-	Popup with ok button should appear.	Popup with ok button should appears.	Pass.	
TC_181	Verify “back to login”	Registration page open.	To validate navigation.	Click “back to login”.	-	Should return to login page.	Returns to login page.	Pass.	

	navigation button works.
